

Pillar Jib Crane OB

Product information

Freestanding jib crane for indoor use. The over braced profile jib crane is braced above the track profile. This jib crane provides the most free-running travel along the arm and gives excellent flexibility for rotations of 270°.

The jib crane is supplied in kit form and consists of two main parts: the pillar and the arm. The pillar is designed and fabricated to suspend the required jib arm type. The arm is fixed to the column using a pivot pin.

Floor fixing is done with chemical anchors or anchor rods with foundation.

Features:

- Capacity up to 1000 kg
- Outreach up to 6 m
- Column height up to 5 m
- Electrical festoon supply: runs inside the arm track

Material: Stainless steel 304/316

Finish: Zinc plated/powder coating
