

Column Mounted Jib Crane with Clamp Around

Product information

This column mounted jib crane consists of an arm and a pair of brackets that can be clamped around an existing building column/stanchion/pillar. This jib crane provides the most free-running travel along the arm and gives excellent flexibility for rotations of 180°.

Column fixing is done with clamping brackets.

Features:

- Capacity up to 1000 kg
- Outreach up to 6 m
- Electrical festoon supply: runs inside the arm track

Finish: Zinc plated/powder coating. Stainless steel 304/316
